LETTER OF REFERENCE

March 25, 2018 Uppsala, Sweden

**To whom it may concern**

This reference letter is provided to Mikael Dubik, who has asked me to serve as a reference on his behalf.

I have been the reviewer for Mikael's Master thesis project, that has been performed at my lab at the Department of Information Technology, Uppsala University, in 2017.

Mikael was hard-working and committed to his project, and also an agreeable person who established good relationships with other people in the group.

His MSc thesis project focused on the implementation and testing of state-of-the-art clustering algorithms for networks, and his contributions are now part of our publicly available network analysis library (<https://cran.r-project.org/package=multinet>), showing both his very good coding skills and that he can successfully work on a complex project and deliver the required results.

If you would like to discuss this further, please feel free to contact me.

Sincerely yours,

A handwritten signature in black ink that reads "Matteo Magnani".
